Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Examiner agreed that 112 1st written description support exists for the limitations which state 1) requesting more of the message and then 2) receiving the message attachment. These limitations are supported with the rationale that when requesting more of a message the user will eventually receive the entire email message including the attachment. Note email system typically do not differentiate between a message body and attachment when sending messages to client systems. In the event that part of a message or a partial message is sent (as is typical in the bandwidth constrained mobile environment) the server merely sends a certain number of bytes to the user each time the user requests more of a message to be transferred.
